## LumiPower Multicolour Lights

### Before You Start

This Quick Start Guide contains essential installation and startup instructions. For additional operation, maintenance, and troubleshooting instructions, please refer to the complete Owner's Manual. Read the complete manual and all safety warnings before commencing installation.

# General Information

LumiPower Multicolour lights allow you to control the colour of the light they emit. You may choose from:

- A series of pre-set colours;
- A series of pre-set changing light patterns.

The available colours and pattern (in order of selection) are:

1. Alpine White
2. Sky Blue
3. Cobalt Blue
4. Caribbean Blue
5. Spring Green
6. Emerald Green
7. Emerald Rose
8. Magenta
9. Violet
10. Slow Splash
11. Fast Splash
12. America the Beautiful
13. Fat Tuesday
14. Disco Tech

The lights can be controlled from Aqualink RS/M8/TRI automation systems, select Salt Water Chlorinators (eXO range and AstralPool Halo), or from the lighting power switch. Please refer to their respective user manuals for further information.

**NOTE:**A 12V AC transformer is required to power the light.

# Operation

When multicolour lights are being controlled from the lighting power switch, the following sequence is required to change the colours:

- When the light is initially turned ON, the colour sequence begins with Alpine White
- To change the colour, turn the light OFF and then ON within three (3) seconds.
- Continue turning OFF and ON until the desired colour mode (from the list in the previous section) is reached.
- When the light is turned OFF for more than seven (7) seconds, it will remain in the colour set that is currently active.
- When the light is turned back ON, the light will be on the same colour set.

*To reset the lights to the beginning of the colour Sequence:*

- Turn the light OFF;
- Wait four (4) to six (6) seconds;
- Turn the light ON;
- The light will return to the beginning of the colour cycle (Alpine White).

Zodiac LumiPower multi-colour lights will synchronise with other Jandy/Zodiac Multi-Colour Water Feature Lights (such as the Zodiac Laminar Jets).

When the Lights are all controlled by Aqualink RS/M8/TRI automation systems, this synchronisation is automatic.

When the lights are controlled by a single switch, synchronisation will be achieved through that switch.

When the lights are controlled by more than one (1) switch, synchronisation is achieved by operating the switches simultaneously.
